

# Hoe wordt AI al ingezet binnen de Medische beeldvorming?

- Modaliteiten zoals CT, MRI, Bucky, Radiotherapie etc.
- Workflow optimalisatie
- Postprocessing beelden
- Business Intelligence

Deep Resolve Boost<sup>1</sup> & Sharp:

**Teamplay insights** tackle sophisticated challenges with deep data insights and interactive data visualisations boards

**Teamplay Dose** Get easy to use tools to monitor, report and benchmark radiation dose values for your entire imaging fleet

**teamplay Usage** Analyze your imaging fleet utilization and understand how you can increase your productivity

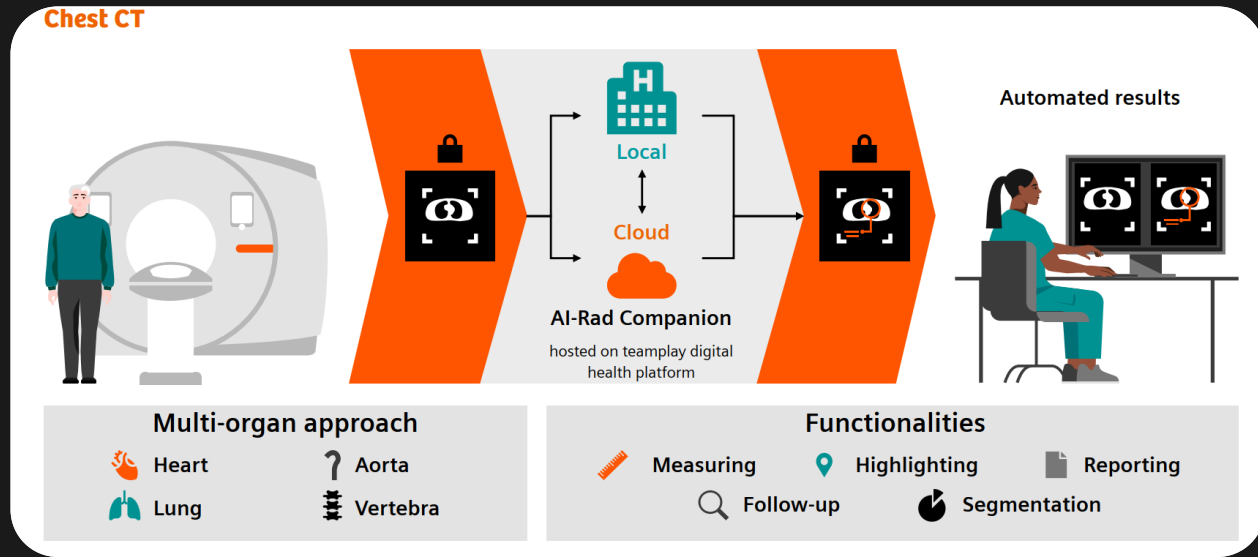

# AI-Rad Companion

## Radiology Decision support systems

### AI-Rad Companion Chest CT

Op AI gebaseerde software voor lezen en rapporteren van Chest CT beelden.

# Remote Scanning

syngo Virtual Cockpit

# GenAI is a revolutionary tool and will transform productivity for radiologists

## How can we support radiologists?

No. of months to 100M active users

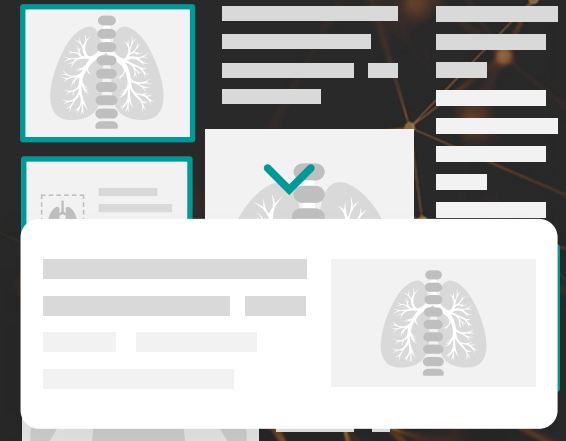

Generative AI was the **fastest adoption** of a digital offering in human history.

But what is

## Generative AI?

Generative AI **learns from patterns in existing data** to order information and generate new content.

Generative AI is a revolutionary tool and will transform productivity for radiologists

# Reveal relevant data from across systems

Area 01  
Thoroughly consolidated patient history

Area 02  
Smartly assisted and intelligent scanning

Area 03  
Reliable assisted reading and reporting

Area 04  
Effective personalized communication

What are the comorbidities?

Heart disease.

Dialogue with the system to request patient details and results.

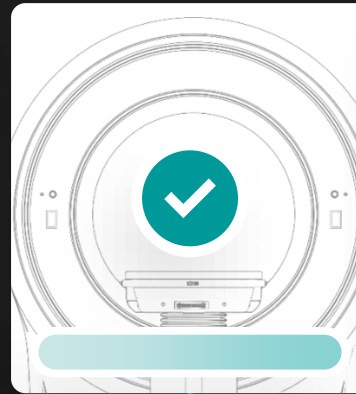

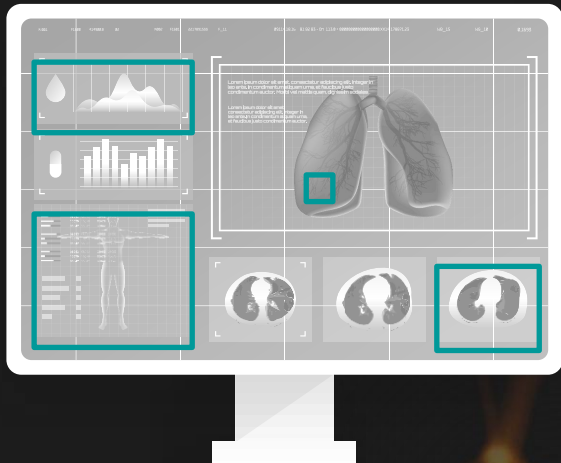

# Scanner configurations are automatically programmed based on patient history

Area 01  
Thoroughly consolidated patient history

Area 02  
Smartly assisted and intelligent scanning

Area 03  
Reliable assisted reading and reporting

Area 04  
Effective personalized communication

Streamlined  
workflow

Tailored,  
reproducible,  
consistent exams

Reducing repetitive  
planning tasks

# Let LLM help find the right clinical valuable content and access to the right information

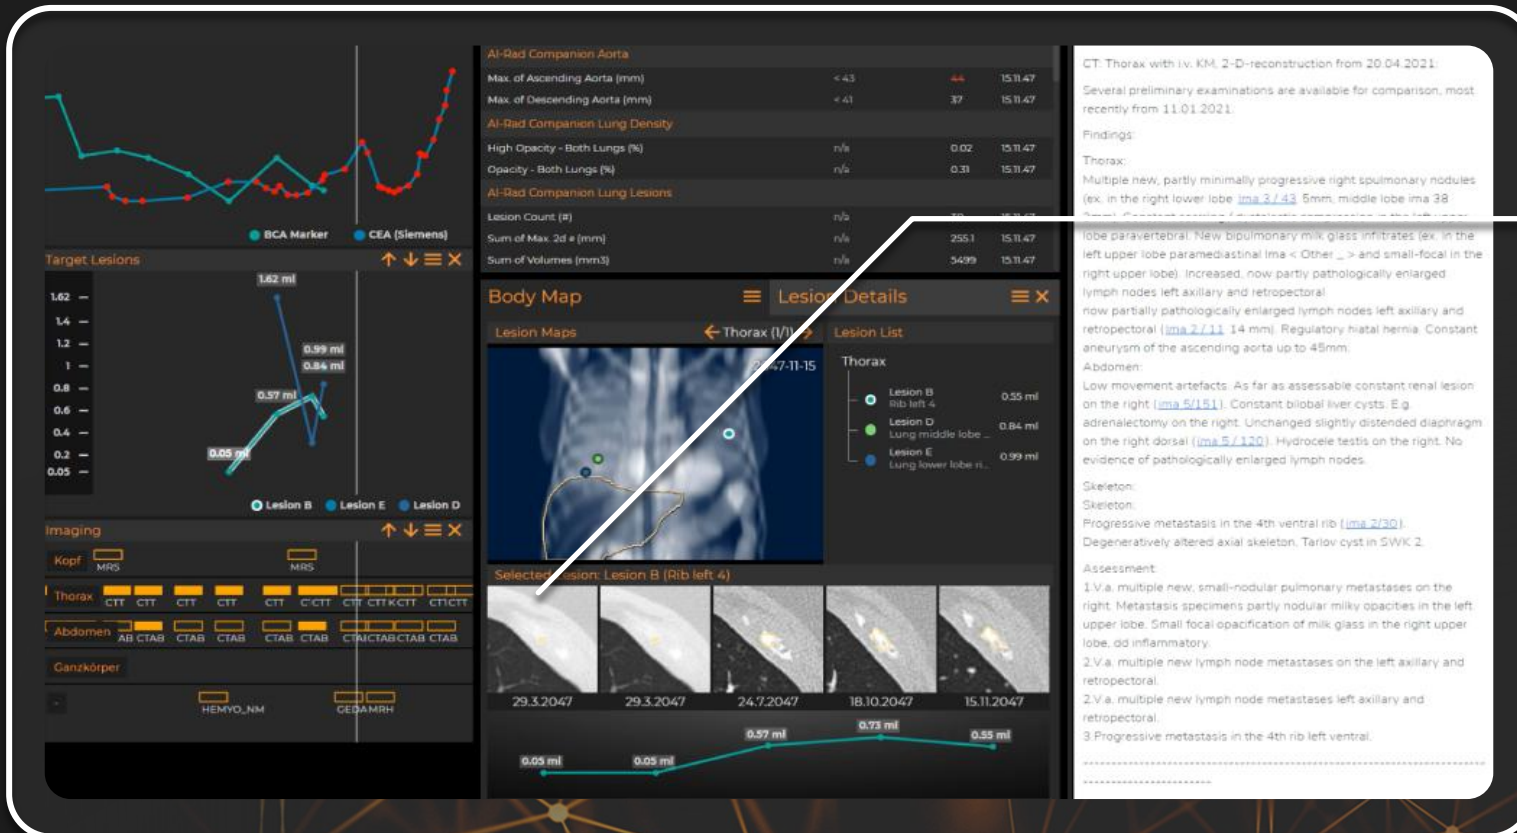

Area 01  
Thoroughly consolidated patient history

Area 02  
Smartly assisted and intelligent scanning

### Area 03

#### Reliable assisted reading and reporting

Area 04  
Effective personalized communication

Longitudinal comparison with exact images including volume measurements help to create an objective understanding of the disease progression.

Having a holistic overview with relevant and disease specific information may help to improve the quality reports and clinical outcomes.

# Thema's rondom de inzet van AI

## Implementatie

AI Platform

Integratie workflow

## Financiering

Business case?

Wie betaalt de AI-oplossingen?

## Ethiek

Patient informeren?

Retrospectieve data?

## Toegevoegde waarde AI

Doet het wat men zegt?

Tijdsbesparing?

Kwaliteit van zorg
